```c
#include <stdio.h>

int main() {
    int min = 11;
    int max = 0;
    int sum = 0;
    int N, i;
    scanf("%d", &N);
    for(i = 0; i < N; ++i) {
        int score;
        scanf("%d", &score);
        sum += score;
        if(score < min)
            min = score;
        if(score > max)
            max = score;
    }

    if(N > 3)
        sum = sum - max - min;
    printf("%d", sum);

    return 0;
}
```
